

Lab 4

Question 1: The linux filesystem

Create a table that includes the following directories and their usage:

Table1

Directory	Function
bin	Essential commands
dev	Device files
etc	System configuration files
home	User home directories
media	Mount point for removable media, such as DVDs and floppy disks
opt	Add-on software packages
proc	Kernel information, process control system hardware information
srv	Information relating to services that run on the system
usr	Software not essential for system operation, such as applications

Create a table of the commands used for navigating the file system (cd, pwd, ls). Your table must include the following:

- The command,
- What the command does
- The syntax/formula of how to use the commands,
- An example

Table 2

Command	What it does	Syntax	Example
pwd	Used for displaying the current working directory.	pwd	Ex. pwd
cd	Used for changing the current working directory. When no directory is given, cd changes the current working directory to the current user's home directory.	cd + destination	Ex. cd ~/Downloads/
ls	Used for displaying all the files inside a given directory. When no directory is specified, ls displays the files in the current working directory.	ls + destination	Ex. ls Music/

Complete all the practice located in the presentation (including the challenge). Take a screenshot of your terminal after every practice.

```
inoquendoosorio@cis106vm: /
inoquendoosorio@cis106vm:~$ pwd
/home/inoquendoosorio
inoquendoosorio@cis106vm:~$ cd Downloads/
inoquendoosorio@cis106vm:~/Downloads$ pwd
/home/inoquendoosorio/Downloads
inoquendoosorio@cis106vm:~/Downloads$ I used relative path
I: command not found
inoquendoosorio@cis106vm:~/Downloads$ cd ../
inoquendoosorio@cis106vm:~$ pwd

Question 5 | The exa command. A modern tool to replace ls

```

inoquendoosorio@cis106vm: ~
inoquendoosorio@cis106vm:~$ exa --help
Usage:
  exa [options] [files...]

META OPTIONS
  -?, --help          show list of command-line options
  -v, --version        show version of exa

DISPLAY OPTIONS
  -1, --oneline        display one entry per line
  -l, --long           display extended file metadata as a table
  -G, --grid           display entries as a grid (default)
  -x, --across         sort the grid across, rather than downwards
  -R, --recurse        recurse into directories
  -T, --tree           recurse into directories as a tree
  -F, --classify       display type indicator by file names
  --colo[u]r=WHEN      when to use terminal colours (always, auto, never)
  --colo[u]r-scale     highlight levels of file sizes distinctly
  --icons              display icons
  --no-icons           don't display icons (always overrides --icons)

FILTERING AND SORTING OPTIONS
  -a, --all            show hidden and 'dot' files
  -d, --list-dirs      list directories as files; don't list their content

  -L, --level DEPTH   limit the depth of recursion
  -r, --reverse        reverse the sort order
  -s, --sort SORT_FIELD which field to sort by
  --group-directories-first list directories before other files
  -D, --only-dirs      list only directories
  -I, --ignore-glob GLOBS glob patterns (pipe-separated) of files to ignore
  --git-ignore         ignore files mentioned in '.gitignore'
Valid sort fields:     name, Name, extension, Extension, size, type,
                        modified, accessed, created, inode, and none.
                        date, time, old, and new all refer to modified.

LONG VIEW OPTIONS
  -b, --binary         list file sizes with binary prefixes
  -B, --bytes          list file sizes in bytes, without any prefixes
  -g, --group          list each file's group
  -h, --header         add a header row to each column
  -H, --links          list each file's number of hard links
  -i, --inode          list each file's inode number
  -m, --modified       use the modified timestamp field
  -n, --numeric        list numeric user and group IDs
  -S, --blocks         show number of file system blocks
  -t, --time FIELD     which timestamp field to list (modified, accessed, create
)
  -u, --accessed       use the accessed timestamp field
  -U, --created        use the created timestamp field
  --changed            use the changed timestamp field
  --time-style         how to format timestamps (default, iso, long-iso, full-is
)
  --no-permissions     suppress the permissions field
  --octal-permissions  list each file's permission in octal format

```

```
